

Integrated Reservoir Solutions Division Core Laboratories

The Integrated Reservoir Solutions Division of Core Laboratories was created to conduct specialized projects involving the multiple disciplines and services capabilities of numerous core lab divisions. We are supported by our staff of senior-level geologists, geophysicists, engineers and petrophysicists who apply proprietary and state-of-the-art techniques from the earliest phases of exploration through the final phases of production.

Technical Sales Advisor International Regional Studies

Core Laboratories' International Studies team of Geoscientists is based in Redhill, Surrey, UK. We are seeking a Geologist who would like to move from a technical position into a business development role with the role of expanding our business in the Europe Africa region. You will join an experienced, highly motivated group and have specific responsibility for:

- Marketing / Sales of our International Study Reports and Datasets – both conventional and unconventional.
- Client Liaison and development of our clientele base.
- Meeting and exceeding sales targets
- Development and implementation of growth plan
- Working with and reporting to Vice President

Requirements:

- Excellent communication and presentational skills
- Prior sales experience would be an advantage but full training will be given where required.
- BSc. in Geology or related Geosciences
- Willing to travel extensively throughout Europe, Africa and N America.
- EEC passport holder or valid UK work permit holders.

Core Laboratories offers a highly competitive base salary and benefit package including bonus scheme. The anticipated start date is mid January 2010.

Only successful candidates will be contacted to attend an interview.
