UK OFFICE - www.faststream.co.uk

Subsea Project Manager - UK

Working as the Subsea Project Manager, you will be running several projects in diverse locations for a globally renowned leader in the provision of specialist maritime and engineering services to the Oil & Gas industry. You will be responsible for consulting directly with stakeholder clients and partners, typically oil majors and operators. You will lead project teams for the management of in-house engineering and site attendance and supervision during transportation and installation.

This is a very rare opportunity for a Subsea Project Engineer from an installation contractor background to take the step up to being a Subsea Project Manager. You will have a team of highly experienced Engineers and Mariners surrounding you but will assume full responsibility for project management and delivery.

This opportunity offers genuine career progression and an environment that will encourage you to quickly develop and progress personally and professionally. Financially, you will be rewarded with a salary in line with your experience paying up to £70k plus benefits.

Marine Superintendent - Brazil

This is a fantastic opportunity for someone to utilise their knowledge of DP shuttle tankers, deep sea tankers and offloading operations offshore between FPSOs/FSOs and tankers. You will look after other specialised offshore vessels to ensure that the marine operational aspects of offshore floating production projects are well planned and executed safely and reliably. We would look for someone with a Masters License, DP experience on tankers, and Portuguese language skills to join the team.
